

Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

PROBLEM

An exploration of electricity consumption patterns

Key rules of brainstorming

To run an smooth and productive session

Stay in topic.

Encourage wild ideas.

Defer judgment.

Listen to others.

Go for volume.

If possible, be visual.

R.Gurubhavani

Launching
automatic
optimisation and
heat recovery
modes in electrical
appliances.

Electricity replace all natural gas and oil that we used in homes and industries.

Install energy efficient light bulbs.

S.Gangadevi

Introducing power efficient hardware and extended its life.

Increase production of electricity by means of non conventional resources.

Using nanogenerators supply electrical current during power shortage and prevent discontinuity of business operation.

Replace incandescent bulbs with LED or CFL models.

Unplug device when not in use.

S.Gopika

Electric shock and burns from contact with live parts.

Provide essential backup power during major electricity outages or disruptions.

Solar power plant is used to reduce the electricity bill.

Eliminate vampire power

N.Janani

Explore of regional high consumption energy patterns and flutuations.

Use smart meter to track electricity usage.

Keep
thermostat at
low
temperature
(about 8).

Evolution of electricity leads to health care (biomedical units).

Using nanogenerators supply electrical current during power shortage and prevent discontinuity of business operation.

Explore of regional high consumption energy patterns and flutuations.

Replace incandescent bulbs with LED or CFL models.

Provide essential backup power during major electricity outages or disruptions.

Electric shock and burns from contact with live parts.

Introducing power efficient hardware and extended its life.

Evolution of electricity leads to health care (biomedical units).

Launching automatic optimisation and heat recovery modes in electrical appliances.

Use smart meter to track electricity usage.

Increase production of electricity by means of non conventional resources.
